Corporate Presentation

September 2025

This corporate presentation is for informational purposes only and must not be used or relied upon for any other purposes. This corporate presentation is not and does not constitute an offer or invitation to subscribe for or purchase, or any solicitation of any offer to subscribe for or purchase, any securities of the Company in any jurisdiction. This corporate presentation must not form the basis of, or be relied on in connection with, any investment decision in relation to securities of the Company nor does it constitute a recommendation regarding securities of the Company.

Market and Industry Data

This corporate presentation includes market and industry data and forecast that were obtained from third-party sources, industry publications and publicly available information. Third-party sources generally state that the information therein has been obtained from sources believed to be reliable, but there can be no assurances as to the accuracy or completeness of included information. Although management believes it to be reliable, management has not independently verified any of the data from third-party sources referred to in this presentation, or analyzed or verified the underlying studies or surveys relied upon or referred to by such sources, or ascertained the underlying economic assumptions relied upon by such sources.

Forward-Looking Statements

This corporate presentation contains “forward-looking information” within the meaning of applicable Canadian securities laws and “forward-looking statements” within the meaning of the United States Private Securities Litigation Reform Act of 1995, (together, “forward-looking statements”), concerning the business, operations and financial performance and condition of the Company. Forward-looking statements include, but are not limited to, statements with respect to the future price of gold; the estimation of mineral reserves and mineral resources; the realization of Mineral Reserve estimates; the Company’s growth prospects; the Company’s estimated 2025 revenues; and the timing and amount of estimated future production. Generally, forward-looking statements can be identified by the use of forward-looking terminology such as “plans,” “expects” or “does not expect,” “is expected,” “budget,” “scheduled,” “estimates,” “forecasts,” “intends,” “anticipates” or “does not anticipate,” “believes,” “projects” or variations of such words and phrases or state that certain actions, events or results “may,” “could,” “would,” “might” or “will be taken,” “occur” or “be achieved.” Forward-looking statements are based on the opinions and estimates of management as of the date such statements are made, and they are subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of the Company to be materially different from those expressed or implied by such forward-looking statements, including, but not limited to, volatility in the price of gold, discrepancies between anticipated and actual production by companies in our portfolio, risks inherent in the mining industry to which the companies in our portfolio are subject, regulatory restrictions, the impact of the current COVID-19 pandemic on the companies in our portfolio, activities by governmental authorities (including changes in taxation), currency fluctuations and the accuracy of the mineral reserves, resources and recoveries set out in the technical data published by the companies in our portfolio. Although management of the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. The Company cautions readers not to place undue reliance on forward-looking statements, as forward-looking statements involve significant risks and uncertainties. Forward-looking statements should not be read as guarantees of future performance or results and will not necessarily be accurate indications of whether or not the times at or by which such performance or results will be achieved. The Company does not undertake to update any forward-looking statements except in accordance with applicable Canadian securities laws. Readers are directed to the Company’s Annual Information Form dated April 29, 2024, filed under the Company’s profile on SEDAR (www.sedarplus.ca) for a complete list of applicable risk factors. Investors are advised that National Instrument 43-101 Standards for disclosure for Mineral Projects (“NI 43-101”) of the Canadian Securities Administrators requires that each category of Mineral Reserves and Mineral Resources be reported separately. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability.

JORC Code

Certain Resource and Reserve estimates covering properties related to certain mining assets in this corporate presentation have been prepared in reliance upon the JORC Code. Estimates based on JORC Code are recognized under NI 43-101 in certain circumstances. In each case, the Mineral Resources and Mineral Reserves included in this presentation are based on estimates previously disclosed by the relevant property owner or operator, without reference to the underlying data used to calculate the estimates. Accordingly, the Company is not able to reconcile the Resource and Reserve estimates prepared in reliance on JORC Code with that of CIM definitions. The Company previously sought confirmation from its Qualified Person who is experienced in the preparation of Resource and Reserve estimates using CIM and JORC Code, of the extent to which an estimate prepared under JORC Code would differ from that prepared under CIM definitions. The Company was advised that, while the CIM definitions are not identical to those of JORC Code, the Resource and Reserve definitions and categories are substantively the same as the CIM definitions mandated in NI 43-101 and will typically result in reporting of substantially similar Reserve and Resource estimates.

Cautionary Note to U.S. Investors

Concerning Estimates of Measured, Indicated or Inferred Resources This corporate presentation uses the terms “measured”, “indicated”, and “inferred” Mineral Resources. United States investors are advised that while such terms are recognized and required by Canadian regulations, the United States Securities and Exchange Commission does not recognize these terms. “Inferred Mineral Resources” have a great amount of uncertainty as to their existence, as to their economic and legal feasibility. It cannot be assumed that all or any part of an inferred Mineral Resource will ever be upgraded to a higher category. Under Canadian rules, estimates of inferred Mineral Resources may not form the basis of feasibility or other economic studies. United States investors are cautioned not to assume that all or any part of measured or indicated Mineral Resources will ever be converted into Mineral Reserves. United States investors are also cautioned not to assume that all or part of an inferred Mineral Resource exist, or is economically or legally mineable.

Qualified Person

Richard Evans, FAusIMM, is Senior Vice President, Technical for the Company and a qualified person under National Instrument 43-101 – Standards of Disclosure for Mineral Projects, has reviewed and approved the scientific and technical disclosure contained in this presentation.

Gold Equivalent Ounces

Elemental’s adjusted royalty, streaming, and other revenue is converted to an attributable gold equivalent ounce, or GEO, basis by dividing the royalty and other revenue from associates in a period by the average gold price for the same respective period, plus the net gold ounces received in the period from streaming investments. The presentation of this non-IFRS measure is intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. Other companies may calculate these non-IFRS measures differently. The production forecast was derived using information that is available in the public domain as at the date hereof, which included guidance and estimates prepared and issued by management of the operators of the mining operations in which Elemental holds an interest. The production forecast is sensitive to the performance and operating status of the underlying mines. None of the information has been independently verified by Elemental and may be subject to uncertainty. There can be no assurance that such information is complete or accurate.

A globally diversified and scalable royalty company well-positioned for future growth

Note: 1) 2025 Guidance as of March 2025

Elemental Altus best positioned among peers to deploy capital in 2025

50% increase in adjusted revenue from royalties to US\$32m in 2025

Additional portfolio payments of up to US\$15m in excess of royalty revenue

Maiden revenue of US\$6.6m received from Koralí-Sud royalty

Over \$80m of non-dilutive capital to deploy from cash and undrawn credit facility

NCIB in place and available to use

1 Delivering Peer Leading Revenue Growth

Continuing Track Record of Growing Revenue Each Year Since Inception

Note: Adjusted revenue includes consolidated revenue of Elemental and Altus, together with unconsolidated revenue attributable to Altus pre-completion of the merger on August 16, 2022. 2024 Adjusted Revenue is unaudited which should be read in conjunction with the Company's audited financial statements for the year ended December 31, 2024, as and when released. Updated 2025 Guidance as of March 2025

¹⁾ Portfolio payments are non-recurring and are in addition to 2025 expected revenue of US\$30.1m - US\$34.3m

2 High Quality Producing Assets – De-risked Portfolio

Portfolio well positioned to leverage increasing gold prices

Net Asset Value

Geography

75% of Net Asset Value from OECD Countries

Stage

2025E Revenue¹

Commodity

Karlawinda and Caserones contribute to ~40% of Elemental Altus Asset NAV

Karlawinda

Uncapped 2.0% NSR

OPERATOR	Capricorn Metals
REGION	Western Australia
COMMODITY	Gold
MINE TYPE	Open Pit
MINE LIFE	10 years
ROYALTY AREA	110km ²
2024 REVENUE	US\$5.2m

- ✓ **Over** 110koz of gold produced per year pre-expansion
- ✓ **Over** US\$5 million in average annual royalty revenue
- ✓ **Recent catalysts:** 15% increase in Reserve to 1,428koz of gold in June 2024
- ✓ **Expansion:** Capricorn approved & regulatory approval received for 25% production increase by mid 2026

Caserones

Uncapped 0.473% NSR

OPERATOR	Lundin Mining
REGION	Chile
COMMODITY	Copper, Molybdenum
MINE TYPE	Open Pit
MINE LIFE	15 years
ROYALTY AREA	166km ²
2024 REVENUE	US\$5.3m

- ✓ **Over** 120kt of copper produced per year
- ✓ **Over** US\$5.5 million in average annual royalty revenue
- ✓ **Recent Catalysts:** in Q4 2024, exploration drilling was completed in the lower portion of the mineral resource in search of higher-grade copper bodies that could improve the overall resource grade and potentially expand it. The drilling program at Angelica in search of copper sulphides was also completed in Q4 2024

Cornerstone uncapped 2% NSR on Capricorn Metal's Flagship Mine in Western Australia

Capricorn has received regulatory approval for major production expansion to 150koz per annum at Karlawinda with 10-year mine life

- Material Production Expansion**
- ✓ Capricorn has received regulatory approval for development of the Expansion Project
 - ✓ Targeting average **annual production of 150koz**, a 25% increase from midpoint of production guidance FY2025
 - ✓ **Increased production** due to a ~50% throughput increase from the installation of a new three-stage crusher and ball mill circuit
 - ✓ Completion of the **expanded plant** expected by the end of Q2 2026
 - ✓ Significant further **potential to increase resources** and reserves down dip of current inventories

2 High Quality Producing Assets - Caserones

Cornerstone uncapped 0.473% NSR on Lundin's Cu-Mo Mine

Exploration Upside at Zero Cost

- ✓ Large land holding with 170km² royalty coverage over 100% of all currently defined resources
- ✓ Opportunity to increase 15-year mine life significantly
- ✓ Primary copper mineralisation remains open in multiple directions
- ✓ 14,209m of diamond drilling completed in 2024
- ✓ 18,000m planned for 2025 - the largest drill program at Caserones since 2013⁴
- ✓ Drilling will target deeper in-pit high-grade breccia zones, in addition to sulphide material beneath the Angelica oxide deposit
- ✓ Geophysical surveys are being completed to define other drill-ready targets

3% NSR¹ on Satellite Deposit of Allied Gold's Generational Sadiola Mine

Elemental's Newest Paying Royalty

- ✓ 3% NSR on the first 226koz gold payable, 2% NSR thereafter
- ✓ Production commenced in Q4 2024 with first payment of US\$6.6m received Q1 2025
- ✓ Up to US\$5m in milestone payments as production advances

Ongoing Expansion and Optimisations

- ✓ Sadiola contains a large mineral inventory with P&P Reserves of 7.2Moz, plus underexplored upside from multiple oxide prospects
- ✓ Allied are targeting a 20+ year mine life in addition to a multi-phased expansion currently being advanced:
 - Phase 1: Increase mill capacity to 5.7Mtpa, with 200-230kozpa of production from Q4 2025
 - Phase 2: Increase mill capacity to 10Mtpa, increasing average production to 400kozpa from 2030 to 2033
- ✓ Elemental Altus' royalty AOI covers two highly prospective licence areas totalling 107km²– both of which are expected to contribute to the increased mill feed as the project develops

Notes: 1) 3% of Net Smelter Returns for the first 226,000 ounces of gold produced from the Mineral Property to the extent recovered from the existing open pitable Measured and Indicated Resources identified in the 2022 Technical Report; and 2% of Net Smelter Returns for any ounces of gold produced from the Mineral Property outside of the area specified above or from the area specified above in excess of 226,000 ounces, 2) Altus Strategies Technical Report titled "Diba & Lakanfla Project Heap Leach Preliminary Economic Assessment (NI 43-101), Mali", dated July 28, 2022.

Satellites at Allied's growing Sadiola Complex

- Following recent success at Diba, exploration attention is now moving towards both **oxide and sulphide extensions at the Korali-Sud Licence**
- Lakanfla**, a Sadiola 'lookalike' with a historic resource, has significant potential to be included in Allied's expanded production plans

Diba Extensions

- In Q1 2025, Allied completed resource drilling at the northern and eastern extensions at Diba, where **mineralisation remains open along strike and down dip**
- Regional geochemical anomalies** may point to an economic quantities of gold below surface cover to the NW of the Diba deposit
- The 'Diba Far East' target – lies along Lakanfla's component of the NNE structural trend and exhibits multiple diorite dyke intrusives **closely associated with Sadiola type ore**

Lakanfla: a Sadiola 'lookalike'

- Lakanfla is a separate earlier-stage exploration licence exhibiting evidence of **carbonate-hosted karst mineralisation**
- Lakanfla Central hosts a Historical Inferred Resource of **3.7Mt @ 0.9g/t for 105koz Au²**, comprised of oxide, transition and fresh ore types
- Drill intercepts include: **127m @ 1.27g/t Au from 21m¹**
- Abundant artisanal workings** at Lakanfla West indicate higher grade oxide gold close to the surface

Notes: 1) Elemental Altus Internal Report titled "Diba-Lakanfla Exploration Potential Summary: Q4 2022", dated December 2022, 2) Altus Strategies Technical Report titled "Diba & Lakanfla Project Heap Leach Preliminary Economic Assessment (NI43-101), Mali", dated July 28, 2022. Elemental Altus Royalties notes the tonnages and grades stated for the Lakanfla property should be treated as historic only. No qualified person has completed sufficient work to classify the historical estimate as current mineral resources or mineral reserves

Uncapped 2% GRR in Western Australia

Laverton Project acquired by A\$5 billion Australian miner Genesis Minerals (ASX: GMD) for A\$250 million

Primed for Production under new Operator

- ✓ ~1.8 Moz of ELE attributable gold resources
- ✓ Genesis notes the clear potential for **Laverton to supply open pit and underground ore** to their operating 3 Mtpa Laverton mill approximately 30 km away
- ✓ Elemental Altus royalty area includes the historic high-grade **underground gold mine at Lancefield**, currently containing an Inferred Resource of 790,000 ounces at 6.3 g/t Au
- ✓ Immediate priorities for Genesis include:
 - **Infill and extensional drilling** with substantial scope for Resource growth
 - Studies to **incorporate multiple oxide and transitional open pits** into Laverton mine plan
 - **Staged mill expansion studies** at Laverton
 - Exploration over **highly prospective tenement package**

Uncapped 4% NSR¹ on Fireweed Metals' Mactung Project

Exposure to the largest high-grade Tungsten deposit in the world²; a strategic Tier-1 critical minerals project being actively developed in Canada

Royalty Highlights

- ✓ **Low Risk Revenue** – fully permitted project bolsters medium to long term ELE revenue stream
- ✓ **Tier 1 Jurisdiction** – Canadian project enhances ELE portfolio quality
- ✓ **High Quality Management** – experienced team with track record of securing mine funding & development
- ✓ **A Lundin Group Company**
- ✓ **Near-term Catalysts** - Comprehensive drilling and field program anticipated in 2025 feeding into an updated Feasibility Study in 2027 and FID by 2028
- ✓ **Secured Government Funding** – awarded US\$15.8m by the US Department of Defence (DoD) to advance Mactung to FID
- ✓ **Leading Critical Minerals Infrastructure** – awarded up to C\$12.9m by the Government of Canada to advance the design and implementation of significant power and transportation improvements in the district

Material Copper Exposure in Arizona, a Tier 1 Mining Jurisdiction

Acquired 0.54% NSR royalty for US\$10 million on Arizona Sonoran's Cactus mine, a uniquely de-risked and high-quality copper porphyry project with a clear pathway to production

Cactus Project Advantages

- ✓ Located in USA's top copper producing state
- ✓ Private landholding substantially streamlining permitting
- ✓ Formerly producing mine with significant **on-site infrastructure**
- ✓ **JV partnership in place with Nuton**, a wholly owned Rio Tinto subsidiary, developing proprietary copper leaching technology
- ✓ Adjacent to Ivanhoe Electric's Santa Cruz Copper Project

Cactus Project Upside

- ✓ Contained metal in ELE's royalty area has increased by over 3x since royalty acquisition¹
- ✓ PEA outlines a conceptual **31-year open-pit operation**, averaging 105ktpa Cu production over first 20 years
- ✓ Advancing to **PFS in H2 2025**
- ✓ **Upside potential** from application of sulphide processing from Nuton and further resource expansions

4 Value Creating Transactions – Exceptional Returns

1) Mid-Tier Peers include Triple Flag, OR Royalties and Sandstorm Gold 2) Major Peers include Wheaton Precious Metals, Franco Nevada and Royal Gold

Superior cash generation from revenue generating portfolio with embedded growth

1

Delivering Peer Leading Revenue and Cash Growth

- ✓ 50% revenue growth in 2025
- ✓ Track record of growing revenue year on year since inception
- ✓ >US\$10m in additional payments in Q2

2

High Quality Producing Assets

- ✓ Caserones and Karlawinda anchor uniquely high-quality royalty portfolio
- ✓ De-risked portfolio – 55% of portfolio is revenue generating

3

Material Organic Growth from Key Assets in 2025

- ✓ Production has begun at Korali-Sud
- ✓ Producing and development assets with substantial exploration upside

4

Track Record of Value Creating Transactions

- ✓ Cash generative portfolio that delivers exceptional returns and value to shareholders
- ✓ Uplift in valuation over time through identified upside

5

US\$80m in Non-Dilutive Capital to Deploy in 2025

- ✓ Undrawn US\$50m credit facility
- ✓ Zero debt
- ✓ Cash generating business

6

Compelling Valuation and Entry Point

- ✓ Standout revenue generator in junior royalty space
- ✓ Undervalued vs peers
